### Customer's feedback:

- Farm productivity are able to be maintained and improved as the figure shows gradual increase in the trendline of Saham Estate productivity.
- Soil physical condition appears to have quiet good textures with the presence of loamy particles in the soil and it is less compacted.

<b>Soil pH:</b>	4.00		
<b>Soil Type:</b>	Sandy Clay		
	<b>Sand (%)</b>	<b>Silt (%)</b>	<b>Clay (%)</b>
	45.24	9.52	45.24

The trendline shows gradual increase in the Jujut Estate productivity from 2015 until 2018.

(12-18 years oil palm)
