

SABAH SOFTWOODS HYBRID FERTILISER SDN. BHD

Before:
pH 4.54

After:
pH 6.13

LADANG SERI HARAPAN, TELUPID, SANDAKAN

Fertilizer: K-Neutralizer

Duration: 6 months of using RealStrong

Area: >1,470 m² (20 palms)

Crop: Oil palm

Remarks:

The soil pH value initially ranged at pH 4.64 (acidic), then it increases to pH 6.50 (close to neutral).

Organic based ingredients in K-Neutralizer are capable to reduce the acidity of soil which would increase nutrient uptake by plants.

Soil pH Comparison over Time
